

BRIDGE YOUR UNIVERSE TOGETHER

 **PATRIOT™**

ABOUT PATRIOT

Patriot started in 1985 in the San Francisco Bay Area. We dedicate ourselves to being the brand of choice for the tech industry with a high commitment to quality and outstanding customer service. Patriot designs, manufactures and markets high performance memory modules, flash memory, mobile accessories and gaming equipment.

MISSION STATEMENT

To be the Brand of Choice for the computer and consumer electronic industries with a commitment to quality and customer service.

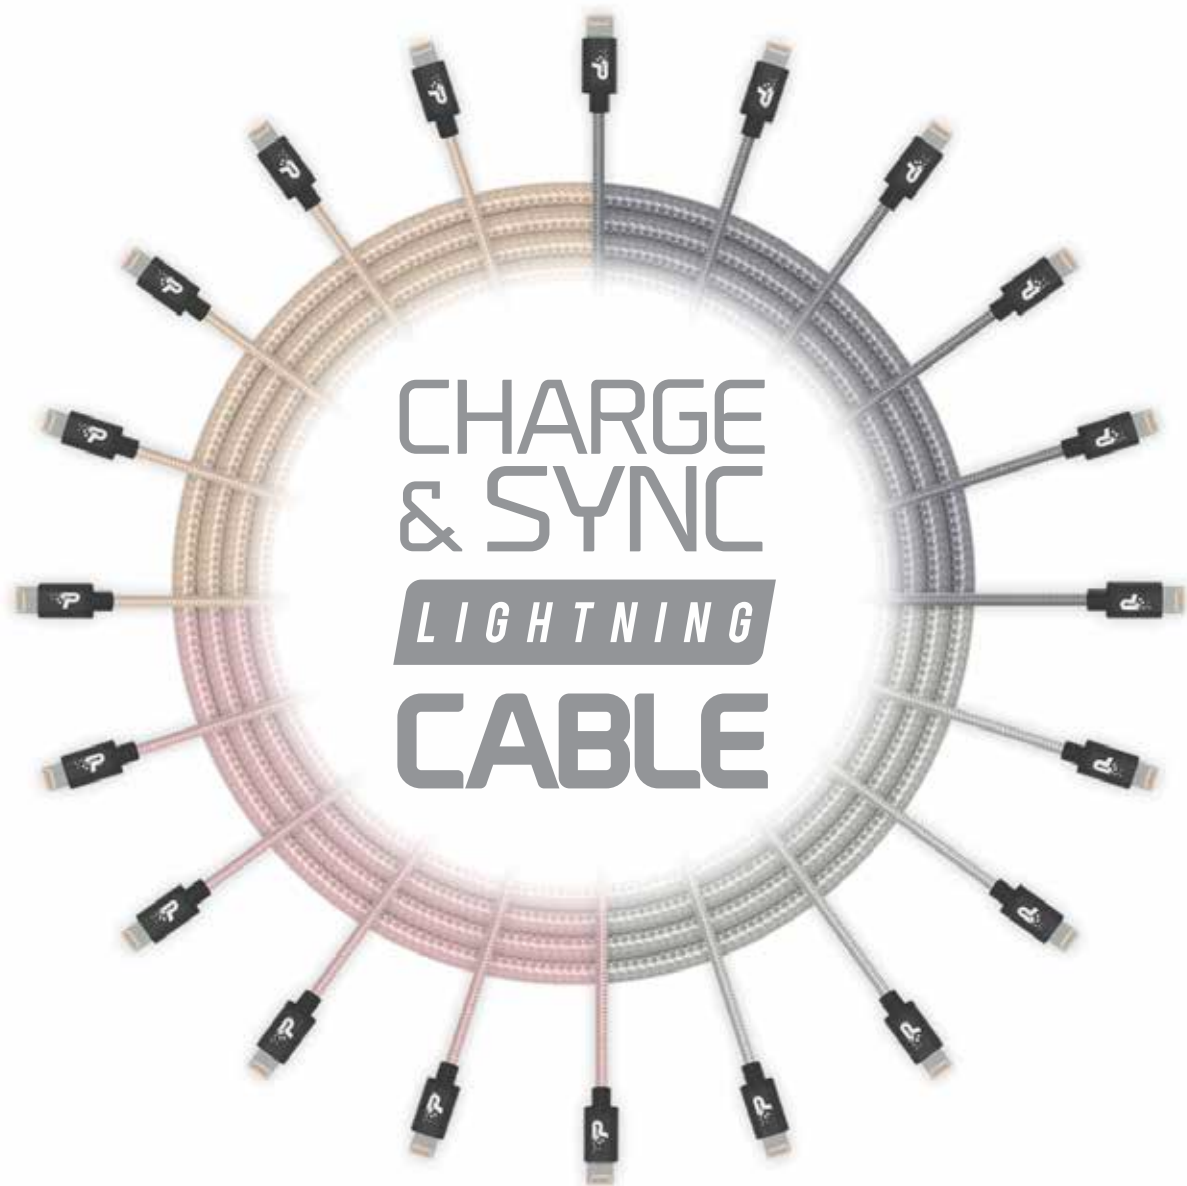

VISION

Commitment and focus on innovation in technology, product quality, and customer satisfaction are the key enablers for future success.

PRODUCT DESIGN

Patriot prides itself on developing new products that offers a style that's sleek, modern and functional. This holds true for our high-performance memory modules, USB Flash memory and mobile accessories line.

Fully MFi (Made For iPhone®, iPad®, iPod®) certified, Patriot's Sync and Charge Lightning™ Cable is the best choice for charging your Apple® device with peace of mind. To obtain MFi certification, this cable passed Apple's® strict process that requires qualifications on product design, quality, and compatibility to ensure it will work properly with supported devices. Why MFi certification does matter? All cables are not created equal - when using Apple® devices that have Apple's® Lightning™ connector, a cable that is not fully MFi certified may potentially damage the device.

The Patriot Sync and Charge Lightning™ Cable is convenient for almost any charging solution. With the ability to both charge and sync data to compatible devices, the Patriot Sync and Charge Lightning™ Cable can power up your device and pass data, unlike cheaper solutions that only offer charge functionality.

Backed by Patriot's award winning customer service, the Patriot Sync and Charge Lightning™ Cable comes with a 2-year warranty.

FUEL STATION mini

PLUG AND
CHARGE

CHARGE
MULTIPLE
DEVICES
SIMULTANEOUSLY

LIGHTWEIGHT
AND PORTABLE

The Patriot FUEL Station mini USB charge base provides an all-in-one solution for charging multiple devices from one wall outlet preventing the headache of searching for spare adapters. With its handy multi-port design, the FUEL Station Mini is perfect for charging multiple smartphones, phablets, tablets, Bluetooth speakers/headsets, portable gaming devices, cameras, and other USB powered devices simultaneously.

The FUEL Station mini charge base is extremely compact and portable so it easily fits into a travel bag or nightstand. With conveniently marked ports that show which outputs charge smartphones and tablets most efficiently, the FUEL Station Mini is the perfect power adapter to consolidate all your chargers take on business trips or family getaways.

Protect your investment. With built in protection against overvoltage, over current, leakage and short circuit, the FUEL Station Mini will ensure your mobile device is safe while charging. FUEL Station Mini is backed a 2-year limited warranty and Patriot's premier customer service.

PORTABLE USB 3.0 HUBS

Never again worry about having enough USB ports for your storage solution or peripheral needs. With Patriot's USB 3.0 High Speed Hub, available in 4 port USB 3.0 or 7 port USB 3.0, you can easily get transfer rates of up to 10X faster than USB 2.0 technology.

CFALJNTLET3

- SATA III (6Gbps) internal interface backwards compatible with SATA II and SATA I drives
- SuperSpeed USB 3.0 (5Gbps) external interface backwards compatible with USB 2.0 and 1.1
- Durable and uni-body aluminum structure
- LED Status indicator
- No additional power required
- Plug and play and driverless
- Lightweight aluminum design
- Compatible with Windows® XP, Windows® Vista, Windows® 7, Windows 8 and Windows® 8.1, Windows® 10 Mac OS X, Linux

CFALJNTLET4

- Support for Type-C Mac and Windows
- USB Type-C cable included
- Supports 2.5inch up to 9.5mm (thickness) hard drives and SSD drives*
- SATA III (6Gbps) internal interface backwards compatible with SATA II & I drives
- SuperSpeed USB 3.1 (10Gbps) external interface backwards compatible with USB 3.0 & 2.0**
- Durable uni-body aluminum structure
- Specially designed ventilated lightweight ABS tray
- LED status indicator
- Driverless, plug and play
- No additional power required
- Compatible with Windows® 10 and Mac OS X using USB type C connecting

USB-C to USB-A 3.0/2.0 3 PORT HUB

Patriot's USB-C to USB-A 3.0/2.0 3-Port Hub, allows you to add one USB 3.0 type-A port and two USB 2.0 type-A ports to your MacBook® and other USB type-C port devices. Enjoy super-speed data transfer up to 5 Gbps, while adding three type-A connection options with this ultra-compact, lightweight, portable hub. The premium aluminum exterior and stylish design are designed to complement the latest MacBook® and Ultrabook designs.

USB-C to USB-A 3.0/2.0 AND 3.0 TF/SD CARD READER

Patriot's USB-C to USB-A 2.0 & 3.0 TF/SD Card Reader hub, allows you to use USB type-A devices on your MacBook® and other USB type-C port devices. The PCUSB33CTS hub also provides the ability to read and write to TF and micro SD cards at USB 3.0 speeds. Enjoy super-speed data transfer up to 5 Gbps, while gaining more connection options with this ultra-compact, lightweight, portable hub. The premium aluminum exterior and stylish design are designed to complement the latest MacBook® and Ultrabook designs.

Wi-Fi AC 1200 Dual Band USB Adapter

The Patriot PCUSBWAC1200 is a feature rich dual band AC adapter, compliant with the latest IEEE 802.11ac standard. It uses a highly integrated RTL8812AU controller which can simultaneously search for 2.4G and 5G networks, and attain transmission rates of 300Mbps at a frequency of 2.4G, and 867Mbps at a frequency of 5G effectively avoiding radio interference and providing fast and stable wireless transmission. The PCUSBWAC1200 also supports a variety of technologies, including WEP, WPA, WPA 2 encryption, Wi-Fi Direct, WPS, Cisco CCX and more.

Wi-Fi AC 600 Dual Band USB Adapter

The Patriot PCUSBWAC600 is a feature rich dual band AC adapter, compliant with the latest IEEE 802.11ac standard. It uses a highly integrated RTL8811AU controller which can simultaneously search for 2.4G and 5G networks, and attain transmission rates of 150Mbps at a frequency of 2.4G, and 433Mbps at a frequency of 5G, effectively avoiding radio interference and providing fast and stable wireless transmission. The PCUSBWAC600 also supports a variety of technologies, including WEP, WPA, WPA 2 encryption, Wi-Fi Direct, WPS, Cisco CCX and more.

Viper LED Series DDR4 DRAM

Patriot Viper LED series memory modules are designed with true performance in mind. Built and tested for the latest platforms, the Viper LED series not only provides the best performance and stability, but also adds some flare for the most demanding gaming PC environments.

The design concept of the Viper LED series' heatshield is to highlight Viper and its line of professional high speed gaming. This high quality aluminum heatshield also offers superior heat dissipation to ensure rock solid performance even when using the most taxing applications.

Viper LED series has the most competitive and aggressive specifications as it is the highest segment of Patriot OC DRAM product lines. The Viper LED series are available in red/white LED color in 8GB/16GB dual kits at speeds from 2400MHz up to 3600MHz.

FEATURES:

- LED Illumination (Available in White and Red)
- Edition: Black sides with Silver Viper logo and pattern
- Compatibility: Tested across the latest Intel and AMD platforms for reliably fast performance
- Feature Overclock: XMP 2.0 support for automatic overclocking
- Aluminum heat spreader with unique and specific design element
- Limited lifetime warranty

Viper 4 DDR4 DRAM - UDIMM

Engineered and built for extreme performance in the most demanding computer environments, Patriot's Viper 4 series is the memory of choice for advanced hardcore gamers, overclockers, enthusiast system builders and content creators. Manufactured using the highest quality components, Patriot's Viper 4 Series DRAM memory kits are hand tested and validated for system compatibility. For excellent heat dissipation to ensure the memory module runs cool and stable, our Viper 4 Series uses a fully custom, air-craft grade all aluminum heat shield. Viper 4 memory will provide speeds of up to 3733MHz, with Intel XMP certification to make for easy overclocking. Both powerful and efficient, these memory modules will provide full performance at only 1.35V and 3733MHz power draw. Amp up your game and let Viper 4 memory by Patriot push your dream PC to the next level.

FEATURES:

- Viper 4 Speeds Available (from 3000MHz to 3733MHz)
- Compatible with both Intel and AMD platforms
- XMP Ready
- Voltage: 1.35V
- 100% Tested and Verified
- Limited lifetime warranty

Viper 4 DDR4 DRAM - SODIMM

The Performance advantage - Patriot's Viper Performance SODIMMs are designed to provide enthusiast performance for faster system response times in the most demanding mobile computing environments. For no hassle upgrades, these kits offer plug and play speeds of up to 2400MHz to 2800MHz.

FEATURES:

- Viper 4 Speeds Available (from 2400MHz to 2800MHz)
- Compatibility: Tested across the latest Intel Core i5 and i7 processors
- Feature Overclock: XMP 2.0 support for automatic overclocking
- Voltage: 1.2V
- Limited lifetime warranty

Viper Elite Series DDR4 DRAM

Delivering speeds of up to 2800MHz, the Viper Elite provides a better gaming experience on the latest platforms to gamers everywhere looking for an affordable, yet reliable upgrade for their battle station. Available in two color combinations, the Viper Elite will be available in red/gray and a gray to offer modders a variety of options when constructing their build.

The Viper Elite series utilizes a custom designed high performance heat shield for superior heat dissipation to ensure rock solid performance even when using the most taxing applications. Built from the highest quality Build of Materials, Patriot's Viper Elite series memory modules are hand tested and validated for system compatibility.

FEATURES:

- Viper Elite Speeds Available (from 2133MHz to 2800MHz)
- Edition: Available in red or gray single/module kit options
- Compatible with both the latest Intel and AMD platforms
- Feature Overclock: XMP 2.0 support for automatic overclocking
- Voltage: 1.2V
- Limited lifetime warranty

Viper 3 Series DDR3 DRAM

Patriot's Viper 3 Series memory modules are designed with true performance in mind. Tested and compatible with Intel's® and AMD's DDR3 compatible processors and chipsets, the Viper 3 series provides the best performance and stability for the most demanding computer environments.

The Viper 3 series utilizes a custom designed high performance heat shield for superior heat dissipation to ensure rock solid performance even when using the most taxing applications. Built from the highest quality Build of Materials, Patriot's Viper 3 Series memory modules are hand tested and validated for system compatibility.

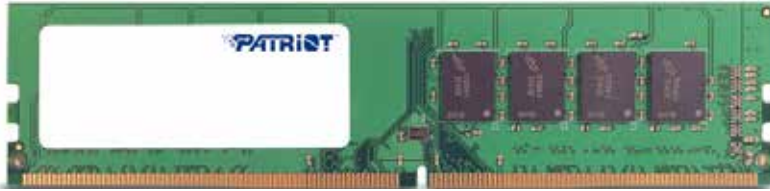

FEATURES:

- Viper 3 Speeds Available (from 1600MHz to 2133MHz)
- Feature Overclock: XMP 1.3 support for automatic overclocking
- Voltage: 1.5V
- 100% Tested and Verified
- RoHS Compliant
- Limited lifetime warranty

DDR2

Signature Line Series DRAM

Patriot's Signature Line memory delivers the quality, reliability and performance expected for today's mainstream computer needs. This DRAM is built for better overall system responsiveness when using demanding applications.

Built using the highest quality components and hand tested, Patriot ensures every module meets and exceeds industry standards to offer you a hassle-free plug-and-play memory upgrade. With free customer service and a limited lifetime warranty.

FEATURES:

- Available Speeds:
 - Signature Line DDR4 (from 2133MHz to 2666MHz)
 - Signature Line DDR3 (from 1333MHz to 1600MHz)
 - Signature Line DDR2 (800MHz)
- Non-ECC UDIMM and SODIMM solutions
- Approved by Leading motherboard and chipset manufacturers
- Voltage: DDR4 = 1.2V, DDR3 = 1.35V ~ 1.5V, DDR2 = 1.8V
- RoHS Compliant
- Limited lifetime warranty

Flare Solid State Drive (SSD)

The Patriot Flare Solid-State Drive (SSD) is the perfect way to enhance your computer system response times, application loading and gaming experience. The Flare offers transfer speeds of up to 555 MB/s read and 535 MB/s write to eliminate bottlenecks and improve overall PC performance. Using a SATAIII 6Gbps interface and backwards compatible with SATAII 3Gbps connections, the Flare SSD provides a more stable environment than a mechanical HDD.

FEATURES:

- Phison S11 Series
- Operating Temperature - 0° ~ 70°C
- MTBF: 2,000,000 hours
- 4K Aligned Random Read: 60GB = 70K IOPS | 120GB = 45K IOPS
- 4K Aligned Random Write: 60GB = 65K IOPS | 120GB = 70K IOPS
- 60GB-Sequential Read/Write Transfer Speeds
ATTO: Up to 555MB/s read & 535MB/s write
CDM: Up to 430MB/s read & 320MB/s write
- 120GB-Sequential Read/Write Transfer Speeds
ATTO: Up to 555MB/s read & 535MB/s write
CDM: Up to 555MB/s read & 475MB/s write

Burst Solid State Drive (SSD)

The Patriot Burst Solid-State Drive (SSD) is the perfect way to enhance computer performance. A SATA III 6Gbps Interface that is backwards compatible with SATAIII 3Gbps, this SSD provides greater performance over traditional HDDs.

At only 7mm high in a 2.5" form factor, the Burst is perfect for any ultrabook or laptop upgrade. Patriot's Burst SSD comes in two sizes for every user, at 120GB and 240GB.

FEATURES:

- Phison S11 Series Controller
- Operating Temperature - 0° ~ 70°C
- DRAM Cache: 32MB SDR
- MTBF: 2,000,000 hours
- Interface: SATA III 6Gbps
- 120GB-Sequential Read/Write Transfer Speeds
ATTO: Up to 560MB/s read & 540MB/s write
CDM: Up to 330MB/s read & 270MB/s write
- 240GB-Sequential Read/Write Transfer Speeds
ATTO: Up to 555MB/s read & 500MB/s write
CDM: Up to 560MB/s read & 455MB/s write

Singe Solid State Drive (SSD)

The Singe 2.5 SATA III Solid-State Drive (SSD) is the perfect way to enhance computer performance. Singe offers transfer speeds at up to 555 MB/s read and 500 MB/s write speeds to eliminate bottlenecks. A SATAIII 6Gbps. Interface that is backwards compatible with SATAIII 3Gbps, this SSD provides greater performance over traditional HDDs.

FEATURES:

- SMI 2258XT Series Controller
- SATA III 6Gbps
- MTBF: 1,500,000 hours
- SLC Caching
- Static Data Refresh
- 4K Aligned Random Read: 240GB = 34K IOPS | 480GB = 48K IOPS
- 4K Aligned Random Write: 240GB = 45K IOPs | 480GB = 48K IOPs
- 240GB-Sequential Read/Write Transfer Speeds
ATTO: Up to 550MB/s read & 500MB/s write
CDM: Up to 540MB/s read & 500MB/s write
- 480GB-Sequential Read/Write Transfer Speeds
ATTO: Up to 550MB/s read & 500MB/s write
CDM: Up to 550MB/s read & 500MB/s write

Hellfire M.2 Solid State Drive (SSD)

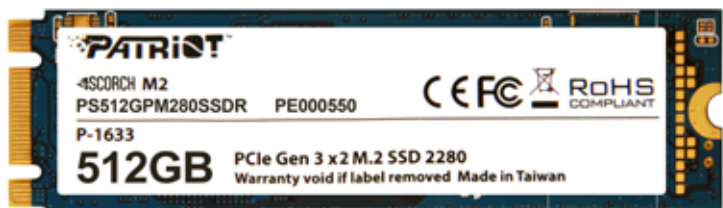

The Patriot Hellfire M.2 Next Generation Form Factor (NGFF) SSD is the perfect solution for consumers and professionals looking to get blazingly fast start up times and instantaneous access to their data for better productivity and reliability from their SSD. Powered by the Phison® 5007 controller, the Hellfire M.2 uses an ultra-fast PCIe 3.0 x 4 (up to 32Gbps) NVMe 1.2 interface to deliver read and write speeds of up to 3,000MB/s (read) and 2,400MB/s (write) that are up to 4x faster than SATA SSDs.

FEATURES:

- Phison 5007 Series M.2 PCIe Gen 3 x 4
- DRAM Cache: 240GB = DDR3L 256MB |
480GB = DDR3L 512MB
- Operating Temperature - 0° ~ 70°C
- ECC Recovery: Up to 120bits/2KB
- MTBF: 2,000,000 hours
- 4K Aligned Random Read: 170K
- 4K Aligned Random Write: 240GB = 185K IOPs
480GB = 210K IOPs
- 240GB-Sequential Read/Write Transfer Speeds
ATTO: Up to 3000MB/s read & 2300MB/s write
CDM: Up to 2740MB/s read & 1090MB/s write
- 480GB-Sequential Read/Write Transfer Speeds
ATTO: Up to 3000MB/s read & 2400MB/s write
CDM: Up to 2550MB/s read & 1260MB/s write

Scorch M.2 Solid State Drive (SSD)

The Patriot Scorch M.2 Next Generation Form Factor (NGFF) SSD is the perfect solution for consumers and professionals looking to get blazingly fast start up times and instantaneous access to their SSD. Powered by the Phison® 5008 controller, the Scorch M.2 uses an ultra-fast PCIe gen 3.0 x 2 NVMe 1.2 interface to deliver read speeds of up to 1700MB/s (read) and 950MB/s (write) that are up to 4x faster than SATA SSDs.

FEATURES:

- Phison 5008 Series Controller
- Available Capacities: 128GB, 256GB, & 512GB
- DRAM Cache: 128GB and 256GB = 256MB | 512GB = 512MB
- End-to-End Datapath Protection
- Operating Temperature - 0° ~ 70°C
- SmartECC
- MTBF: 2,000,000 hours
- 4K Aligned Random Read: Up to 200K IOPs
- 128GB-Sequential Read/Write Transfer Speeds
ATTO: Up to 1700MB/s read & 415MB/s write
CDM: Up to 1450MB/s read & 415MB/s write
- 256GB-Sequential Read/Write Transfer Speeds
ATTO: Up to 1700MB/s read & 780MB/s write
CDM: Up to 1500MB/s read & 770MB/s write
- 512GB-Sequential Read/Write Transfer Speeds
ATTO: Up to 1700MB/s read & 950MB/s write
CDM: Up to 1600MB/s read & 950MB/s write

Supersonic Rage USB 3.1 Flash Drive

The Patriot Supersonic Rage is the perfect solution for those looking for both an ultra-portable form factor and the high performance transfer speeds of USB 3.1, Gen. 1 (USB 3.0). Designed with a custom retractable USB housing, the Supersonic Rage provides a unique all-in-one slide to connect design for best in class protection from wear and tear.

Supersonic Rage 2 USB 3.1 Flash Drive

The Patriot Supersonic Rage 2 is the perfect solution for those looking for both an ultra-portable form factor and the high performance transfer speeds of USB 3.1, Gen. 1 (USB 3.0). Designed with a rubber coated housing, the Supersonic Rage 2 provides the best protection from wear and tear.

Supersonic Mega USB 3.1 Flash Drive

The Patriot Supersonic Mega USB 3.1 Gen. 1 flash drive delivers combines superior performance with a stylish form factor, making your data safe and easily accessible. With storage capacities ranging from 128GB to 512GB, the Supersonic Mega provides some of the largest storage solutions on the market. A durable aluminum enclosure enables shock resistance up to 15Gs to ensure greater protection of your data.

Supersonic Magnum 2 USB 3.1 Flash Drive

The Patriot Supersonic Magnum 2 USB 3.1 Gen. 1* flash drive delivers unprecedented performance in a stylish form factor with storage capacities up to 512GB. A durable aluminum enclosure enables shock resistance up to 15Gs to ensure greater protection of your data.

USB

Supersonic Boost XT USB 3.1 Flash Drive

Gain the performance advantage with the Supersonic Boost XT. Supporting USB 3.1, Gen. 1 (USB 3.0), the new standard in USB flash storage; the Supersonic Boost XT provides superior transfer speeds over USB 2.0 with performance of up to 150MB/s. This extra performance makes the Supersonic Boost XT the perfect choice for large file transfers so you can always have your data in a fast paced, demanding lifestyle.

VIPER USB 3.1, GEN. 1 Flash Drive

The Viper USB 3.1 Gen. 1 flash drive delivers the trifecta of user needs; speed, mass storage and value. With storage capacities ranging from 64GB to 256GB, the Viper USB provides gamers with the large amount of storage space needed to load the latest games and play anywhere. The rubber-coated, rugged USB and swing design, ensure greater protection of your data.

SLATE USB 3.1 Flash Drive

Update your busy lifestyle with The Patriot Slate. The Slate is the perfect solution for having both style and portability to ensure you'll always look good and have your data while leading a busy lifestyle. The Slate has a sleek housing to offer excellent protection from everyday use.

BLITZ USB 3.1 Flash Drive

Take all your music, movies, photos, and data with you and add style to your routine with the Patriot BLITZ. The BLITZ provides the faster transfer speeds of USB 3.1, Gen. 1 (USB 3.0) while offering backwards compatibility with USB 2.0. This makes BLITZ the perfect future proof USB storage solution for those who have yet to upgrade their PC or laptop, while also offering a performance jump to those using USB 3.0 compatible PCs.

GLYDE USB 3.1 Gen. 1 Flash Drive

The Patriot Glyde is the perfect choice for those looking for an entry level USB 3.1, Gen. 1 (USB 3.0) flash drive. Stylish and sleek, the Patriot Glyde not only has a modern look, but is also designed for excellent reliability and exceptional performance. Light and portable, its simple slide-to-connect housing makes it the ideal drive for everyday use.

TAB USB 3.1 Flash Drive

The Patriot Tab is the next generation in speed and ultra-portability. Micro-sized with the enhanced transfer speed of USB 3.1, Gen. 1 (USB 3.0), the Tab is the best lifestyle solution for those looking for excellent performance in an ultra-light extremely portable storage device. Plug in the Patriot Tab and it becomes barely noticeable to fit with the look of any PC or laptop.

SPARK USB 3.1 Flash Drive

The Patriot Spark combines exceptional speed and ultra-portability. With the enhanced transfer speed of USB 3.1, Gen. 1 (USB 3.0), the Spark features a micro-sized form factor providing the best solution for those looking for both excellent performance and ultra-light portability. Plug in the Patriot Spark and it becomes barely noticeable to fit with the look of your PC or laptop.

XPORTER PULSE USB 2.0 Flash Drive

Small, stylish, and always ready to go, the Patriot Xporter Pulse delivers excellent transfer speeds and comes equipped with an all-aluminum housing for best in class protection. Measuring in at just 2.21" long and just over a .5" wide, the Patriot Xporter Pulse provides the perfect small form factor solution for excellent portability. Available in black and silver.

TRINITY 3-1 USB FLASH DRIVE

Our new Trinity USB flash drive will be the perfect companion for those who want to travel light but still keep all the essentials with you. Offering 3 different adapters - Micro B, Type A and Type C - it's a great accessory to throw in your bag and be ready for when you need it. The high-performance Trinity 3-in-1 USB drive will be available in a variety of capacities with ultra-fast speeds.

FEATURES:

- A complete storage solution to serve multiple devices
- Interface: Micro B, Type A, and Type C - USB 3.1 Gen 1
- Small Compact Housing
- Available Capacities: 32GB, 64GB, and 128GB
- High Performance:
 - 32GB up to 200MB/s read and 25MB/s write
 - 64GB up to 200MB/s read and 100MB/s write
 - 128GB up to 200MB/s read and 100MB/s write

EP Pro Series SD Flash Memory Card

The EP Pro is the new high performance flagship in Patriot Memory's secure digital card line up. Designed specifically for high definition video and photography enthusiasts, the Patriot EP Pro SDHC/SDXC delivers unparalleled transfer speeds of 90MB/s (read) and 50MB/s (write) and capacities up to 128GB.

EP-X Series SD Flash Memory Card

The EP-X Series is our high performance line which targets multiple devices from mobile phones, to camcorders, to 360° cameras, to Virtual Reality (VR) cameras to drones. Not only is this the perfect choice for those users recording in 4K ultra high definition, but the EP-X is also A1 rated which means you can run your applications flawlessly from any supported mobile device.

LX Series SD Flash Memory Card

The Patriot LX UHS-I/Class 10 SDHC/SDXC memory card offers amazingly fast performance to capture your images or video as they happen without missing a moment. The LX Class 10 SDHC/SDXC memory cards are fully compatible with the latest SD Association 3.0 specification which offers increased storage capacity from 32GB to 256GB and with up to 80MB/s read and 20MB/s write.

Instamobile SD Flash Memory Card

Patriot's Instamobile UHS-I compatible SDHC and SDXC flash memory cards offer ultra-fast performance for the ultimate storage upgrade solution for the latest smartphones, tablets and cameras designed for HD recording. Exceeding the SD Association specifications for Class 10 certification, these memory cards provide transfer speed of up to 70MB/s read.

FLASH CARDS

EP Pro Micro SD SD Flash Memory Card

For demanding hi-def multimedia professionals, the Patriot EP Pro microSDHC/microSDXC flash cards provide ultra-high speeds and a high capacity solution in a small form factor. With read speeds of up to 90MB/s and write speeds up to 80MB/s when used with UHS-I compatible devices, the EP Pro microSDHC/microSDXC cards provide performance for ultra-high resolution photography and full HD video recordings of up to 4K.

EP Series Micro SD SD Flash Memory Card

For demanding hi-def multimedia professionals, the Patriot EP Series microSDHC/microSDXC flash cards provides ultra-high speeds and a high capacity solution in a small form factor. With transfer speeds of up to 90MB/s when used with UHS-I compatible devices, the EP Series microSDHC/microSDXC cards provide the performance necessary for ultra-high resolution photography and full HD video recordings of up to 4K.

LX Series Micro SD SD Flash Memory Card

Patriot's LX Series UHS-I compatible MicroSDXC flash memory cards offer blazingly fast performance for the ultimate storage upgrade for HD camcorders and mid-range cameras. These memory cards are Class 10 certified and meet the latest SD Association specifications by providing a minimum sustained write speed of 10MB/s.

Instamobile Micro SD SD Flash Memory Card

Patriot's Instamobile UHS-I compatible microSDHC and microSDXC flash memory cards offer ultra-fast performance for the ultimate storage upgrade solution for the latest smartphones, tablets and cameras designed for HD recording. Exceeding the SD Association specifications for Class 10 certification, these memory cards provide transfer speed of up to 90MB/s.

ABOUT VIPER GAMING

WHO WE ARE

Viper Gaming is a brand of Patriot Memory LLC, a global leader in performance memory, SSDs and flash storage solutions. Viper Gaming was established in 2007 with the unveiling of the well-known, top-tier line of computer memory. Since then, the Viper Gaming brand has become synonymous with elite performance and reliability among gamers worldwide.

In 2015, Viper Gaming decided to expand its product categories to include gaming keyboards, headsets and mice. Offering entry, mid-level and high-end solutions with rich feature sets that won't break the bank, Viper Gaming's award-winning peripherals provide gamers everywhere the best price-for-performance and reliability that enables every Viper Gamer to dominate in their sport.

OUR VISION

Viper Gaming is relatively new to the peripheral market, however, Patriot has over 25 years of experience building high performance memory kits and has been providing Viper memory to the gaming enthusiast audience for the past 10 years – so this is nothing new to us. Viper Gaming is committed to designing and engineering products that gamers of all kind will appreciate, plain and simple.

OUR PRODUCTS

Viper Gaming builds high quality products for every type of gamer. Whether you're looking for absolute precision for the 12 hour gaming marathons, or just need something to give you a little edge when playing on the weekends – Viper Gaming has something to fit your lifestyle. All of our products are put through rigorous, real-world quality tests to make sure they withstand whatever you throw at them (or whenever you throw them in a fit of rage – no judgement).

GAMER CERTIFIED

Gamers are picky – nothing gets by them and they immediately shoot someone down (pun intended) if they receive anything less than perfect. Viper Gaming takes pride in bringing only the best products to ensure that no gamer is left behind. We understand the need for high quality accessories that will power through everything – whether you're a novice that only plays on weekends or the expert that has 12-hour gaming marathons. This is why Viper Gaming is **GAMER CERTIFIED™**.

V770 KEYBOARD

EXPERT

The Viper V770 RGB mechanical keyboard is a must-have for all serious gamers. Kailh Red mechanical switches provide a smooth linear movement and quieter keyboard with 5 dedicated macro keys, dedicated media controls, volume/mute control wheel and auxiliary USB and audio pass-through ports built on-board for ultimate control. It also has 109 key rollover and anti-ghosting capabilities so no key stroke will go unnoticed while dominating your friends in the latest game. The Viper software gives you the ability to illuminate each key with up to 16.8 million colors, set up 5 user profiles, 10 different lighting effects and up to 108 macro settings – making the V770 one of the most customizable keyboards available on the market today.

“THE V770 IS SURE TO BE THE ENVY OF ALL YOUR FRIENDS AT THE NEXT LAN PARTY.”

FEATURES

- 5 gaming profiles
- 100% Kailh Red Mechanical Switches
- 108 programmable macro keys
- 109 key rollover anti-ghosting
- Full spectrum RGB;
16.8 million colors for individually customizable backlit keys

V570 MOUSE

EXPERT

V570 Blackout Gaming Mouse – Also available in red buttons

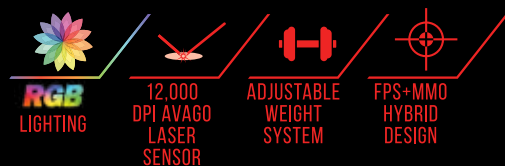

The V570 RGB laser gaming mouse is one of the most versatile mice on the market today. With its unique FPS & MMO hybrid design, you can dominate in a wider array of games. The V570 includes a dedicated sniper button – which will give you the advantage in any FPS game. The highly customizable design allows you to add 34.2g of weight and custom color 7 LED lighting zones with 16.8 million colors. Our Viper software will allow you to program up to 13 macro buttons for easy access during intense gaming, set up RGB profiles and adjust the sensitivity to your preference.

“WITH A DEDICATED SNIPER BUTTON, YOU CAN GET THAT KILL SHOT EVERY TIME WITH QUICK PRECISE ACCURACY.”

FEATURES

- Up to 12,000 DPI that can be switched on the fly with the press of a button
- Xtreme precision laser sensor for ultra precise tracking and response
- Create different on-board gaming profiles for game specific setups
- Fine tune both overall weight and balance to compliment various unique playing styles
- Features a FPS layout with dedicated sniper button and ergonomic MMO key layout design to accommodate multi-game play environments

V560

INTERMEDIATE

The Viper V560 gaming mouse is one of the most customizable mice on the market with up to 29.4g of adjustable weight and 5 onboard profiles. 9 programmable macro buttons are easily accessible to help you when you need them most and allow you to switch profiles quickly to fit personal gaming techniques. Our Xtreme Precision laser sensor has up to 12,000DPI for accuracy and speed – perfect for maneuvering through the most demanding games. Conveniently located DPI LED lights indicate the current DPI level, which can also be modified with our Viper software.

FEATURES

- Up to 12,000 DPI for accuracy and speed
- Xtreme precision laser sensor for ultra precise tracking and response
- Create up to 5 different on-board gaming profiles for game-specific set-ups
- Fine tune both overall weight and balance to unique playing styles

V370 HEADSET

EXPERT

The Viper V370 RGB 7.1 virtual surround sound gaming headset is the ultimate accessory for the hardcore gamer. Experience Patriot's revolutionary Ultra Bass Response (UBR) system to add an extra dimension of enhanced audio to your game play. Featuring a closed back and ergonomic ear cups, the V370 was made to engage and provide an enhanced PC gaming experience. Designed with the hardcore gamer in mind, the V370 blocks out environmental noise and has interchangeable ear pads so you have full control over your preferences. The built-in microphone provides crystal clear sound and folds away seamlessly while not in use. All controls are located on the ear cup and the Viper software makes it easy to adjust the RGB LED illumination and audio settings.

“IMMERSE YOURSELF INSIDE OF THE GAME AND ENHANCE YOUR EXPERIENCE WITH THE V370 HEADSET.”

V330

NOVICE

The Viper V330 stereo gaming headset is designed to provide an enhanced PC and mobile gaming experience. Engineered with the everyday gamer in mind, our V330 headset has a closed back and ergonomic ear cups keeping you comfortable while you play. The Viper V330 headset comes with a built-in microphone that folds away seamlessly when not in use. Volume and microphone controls are conveniently located on the ear cup, eliminating the need for a heavy audio controller on the cord. Also included is a Y-splitter so you can play games or listen to your favorite music on your mobile devices.

FEATURES
